### DANE W. SAID...

Dr. Wilkinson is amazing. He has made this entire, trying experience so much easier. Because of his skills, experience and personality, we have always had confidence that the outcome would be as positive as it could be.

### TIM B. SAID...

I had heard about this procedure for several years, but I was still skeptical and terrified of it. Everyone at your office and surgery center was patient, kind and supportive. This new vision I have is nothing short of a miracle, and I thank you again for helping me really see.

## WHAT IS LASIK?

LASIK (an acronym for Laser Assisted IntraStromal Keratomileusis) improves vision problems by reshaping the cornea, correcting the eye's focusing element. The laser used for LASIK was first developed in the 1970s to etch delicate computer chips. The beam is precise enough to remove tissue from the eye that is thinner than a piece of human hair without causing damage to surrounding tissue.

Having performed lasik since 1995, excel is one of Utah's finest choices for patients who desire vision correction surgery. At Excel we use the latest in refractive technology. Currently we offer patients the VISX Star 4 with 3D ActiveTrak and iris registration—the most advanced laser approved by the FDA. This allows for pinpoint accuracy by automatically tracking the tiny motions of your eye in all three directions during laser procedure.

### DANE W. SAID...

Dr. Wilkinson is amazing. He has made this entire, trying experience so much easier. Because of his skills, experience and personality, we have always had confidence that the outcome would be as positive as it could be.

AM I A CANDIDATE FOR LASIK SURGERY?

## WHAT CAN I EXPECT?

### PROCEDURE

LASIK surgery takes less than 15 minutes from beginning to end. Eye drops are given to numb the eye, making the procedure virtually painless. A device is inserted over the eye to keep the eyelids open during the procedure. Next, the surgeon creates a protective corneal flap using IntraLase—making it an all-laser procedure. When the eyes are perfectly aligned, the doctor engages a computer-controlled beam of cool laser light. The laser takes less than one minute per eye.

Although you will be able to hear the laser working and your vision will be temporarily blurry, you will not feel the laser working. Once the

lasering is complete, the doctor will replace the corneal flap. Most patients experience improved vision immediately as they walk themselves back to the waiting room. Prescriptions typically stabilize within a few days or weeks after the surgery.

### RECOVERY TIME

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Curabitur ut maximus purus. Morbi eget rutrum neque, tempus ullamcorper quam. Vivamus porta augue sed faucibus aliquet. Donec sed porttitor tellus. Aliquam nec sapien luctus massa tincidunt efficitur.

## MEET DR. GUNTHER

Jon Gunther, M.D. specializes in all medical retinal conditions, including diabetic eye disease and macular degeneration. He also provides general ophthalmology care, including treatments for cataracts.

Dr. Gunther has performed extensive clinical research and has served as an investigator for numerous national clinical research trials for macular degeneration. His extensive research has been published in numerous ophthalmology journals and textbooks.

Dr. Gunther completed his medical retina fellowship and residency in ophthalmology at the University of Wisconsin hospital and clinics. He also completed an internship in Internal Medicine at the University of Utah School of Medicine. Dr. Gunther graduated from the Columbia University College of Physicians and Surgeons in New York City. He received his Bachelor of Science degree (magna cum laude) in finance from Brigham Young University (BYU) in Provo, Utah.
